

MOHD SAAD

Software Engineer | JavaScript & Java / Spring Boot

+91-7017315418 • saad500nbd@gmail.com • [LinkedIn](#) • [Portfolio](#) • New Delhi, India

SUMMARY

Full-stack Software Engineer with 5+ years of experience designing and building scalable web applications and backend services across JavaScript (React, Next.js, Node.js) and Java (Spring Boot) ecosystems. Skilled in RESTful and microservices API design, relational and NoSQL database architecture, and CI/CD-driven cloud deployments on AWS and GCP. Proven track record of owning features end-to-end — from system design and API contracts through production deployment — within cross-functional Agile teams.

EXPERIENCE

Mobiuso Technologies Pvt. Ltd 10/2022 – Present

Software Engineer

- Own end-to-end delivery of core product modules — from technical design through production rollout — supporting video content, user onboarding, and service bookings.
- Design and maintain RESTful APIs with Node.js and Express.js on a MongoDB-backed codebase; build dynamic, high-performance UI modules with React.js, TypeScript, and Next.js for onboarding and scheduling flows.
- Design and build RESTful microservices using Spring Boot and Spring MVC on a separate backend initiative, integrating with Microsoft SQL Server via Spring Data JPA and native JDBC; built a scheduled batch-processing service for backend data workflows.
- Lead system design decisions across both efforts — database schema (MongoDB and SQL Server), service decomposition, and API versioning strategy — and centralize configuration for the microservices stack using Spring Cloud Config.
- Engineer secure, large-scale video storage and retrieval using Google Cloud Storage (GCS); package services with Maven and ship through Jenkins-based CI/CD pipelines, deploying containerized (Docker) services to AWS, with working exposure to Kubernetes-based orchestration.
- Collaborate cross-functionally with product, design, and backend teams in an Agile environment; participate in code reviews and technical design discussions, delivering features in iterative sprints.

Miniventure Lab Pvt. Ltd 05/2022 – 08/2022

Software Engineer Intern

- Developed a student dashboard and subscription flow for an Edtech SaaS platform using React.js, Node.js, and MySQL.
- Integrated Google Analytics and custom tracking, improving funnel visibility by 60%.

GlobalLogic Inc 06/2021 – 05/2022

Associate Software Engineer

- Delivered a production-grade finance dashboard using React.js and Chart.js, translating Figma designs into interactive, real-time data visualizations powered by REST APIs — improving user task completion time by 20%.
- Improved data flow efficiency by 15% by aligning API contracts with backend teams.

EDUCATION

National Institute of Technology, Warangal 07/2019 – 06/2021

M.Tech — Process Control and Automation

KIET Group of Institutions, Ghaziabad 07/2014 – 06/2018

B.Tech — Electronics & Instrumentation

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS/SCSS, Tailwind CSS, Redux, Zustand

Backend & APIs: Node.js/Express.js, Spring Boot, Spring MVC, RESTful APIs, Microservices Architecture, Spring Cloud Config

Databases: PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Spring Data JPA, JDBC, Prisma, Mongoose

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, Bitbucket Pipelines, CI/CD

Languages: JavaScript, TypeScript, Java, Python

Tools & Collaboration: Git, GitHub, Bitbucket, Figma, Agile/Scrum, Webpack, Vite

KEY ACHIEVEMENTS

- Improved onboarding funnel visibility by 60% at Miniventure Lab by integrating Google Analytics and custom event tracking into the subscription flow.
- Raised user task completion time by 20% at GlobalLogic by translating complex Figma designs into interactive, real-time dashboards backed by REST APIs.
- Delivered production RESTful services across two backend ecosystems — Node.js/Express and Java/Spring Boot — within the same engineering organization, reflecting range across polyglot architectures.
- Own end-to-end feature delivery — from technical design through production deployment — across 5+ years and three engineering organizations.

PROJECTS

GIDE.AI — AI-driven Edtech platform for student career and university guidance

<https://web.gide.ai/>

Contributed to building an AI-powered career guidance platform using the MERN stack with a MySQL database. Developed key frontend modules and backend APIs, focusing on user dashboards, authentication, and data integration.

NWN.ai — AI-powered tech solutions for the modern workplace

<https://dev-configurator.nwncarousel.video/>

Contributed to client-facing and admin interfaces for NWN.ai's room configurator tool using the MERN stack (MongoDB, Express, React, Node.js). Built interactive UIs, implemented backend APIs, and supported configuration and management of modern workplace solutions.

SimpleTherapy — MSK & Behavioral Health Platform

<https://app.simpletherapy.com/>

Managed front-end operations for a comprehensive MSK and behavioral health platform. Built dynamic interfaces with React.js and Redux, and integrated Google Maps APIs to optimize in-person care routing.
